

CrystaLite Express Rail

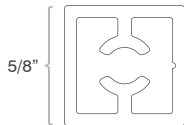

The Savings is in the Installation

The CrystaLite Express Rail is specifically designed with quick easy installation in mind. Sections of railing are pre-fabricated at our manufacturing plant and then delivered ready to be installed. The Express Rail is ideal for use with multi-family construction and do-it-yourself projects.

Features and Stipulations

- Pre-built spans from 2 - 12 feet in 1 foot increments.
- Easy installation with very little field labor.
- Standard and Sculptured Picket options available.
- Structurally engineered to meet the Building Codes.
- Sturdy 6063-T6 aluminum alloy components.
- Standard 36" residential or 42" commercial heights.
- **Not for use on stairs.** Use our 9000 system for stairs and slopes

Post Installation

Express Rail is designed to mount on our 9006 Railing Post. Our adjustable corner post could also be used which is stock at 135°. This reduces the need for miter cuts in the field. Custom angles available.

Wall Installation

Further savings in material can be utilized by mounting the Express Rail directly to a wall where applicable - or post by other.
